

GW2 Progression OS

Goal-Driven Player Growth Guide

Turn account data into your next best action.

INSIGHT

Know your account state

ACTION

Do the next best thing

PLAN

Follow a 7-day path

Try Demo · Connect API Key · Generate Your Plan

Say one line. Get a plan.

Lost?	Plan my week
Legendary?	I want to finish Bolt
Gold?	Make gold this week
Fractal / Raid?	I need a fractal-ready build
Returning?	I came back after a long break
No key?	Try Demo

New Player

Simple weekly plan, glossary, low-pressure actions

Returning Player

Old build audit, hidden wealth, inventory cleanup

Legendary Hunter

Materials, currency, achievements and time-gates

PvE Player

Fractal/Raid/Strike-ready build readiness

Economist

Account value, liquidity, TP opportunity

Casual Player

30-minute daily plan, low-effort mode

Guild Lead

Shareable reports now, Guild Edition later

Privacy Sensitive

Session mode, anonymous sharing, read-only API

Goal-Driven OS Flow

From a player wish to a progression plan.

1. Connect

Session-only API key; Try Demo without key

2. Speak Goal

Finish Bolt · Make gold · Prepare a build

3. Progressive Preview

Wallet -> value -> build -> full plan

4. Iterate

Make cheaper · Avoid WvW · 1 hour/day

5. Export

Copy plan · HTML/PDF report · Weekly updates

Returning Player Audit

Old accounts often hide value, outdated builds, and unfinished goals.

Prompt

"I came back after a long break, tell me what to do first"

Build Check

Current build vs SnowCrows / MetaBattle; marked as outdated, partial, or verified.

Asset Audit

Total value, hidden wealth, vendor value, and high-value legacy items.

Inventory Cleanup

What to salvage, sell, store, or keep for future goals.

Closest Goal

Nearest legendary or progression target, with cost and days remaining.

Gold Rebuild

Daily revenue route if wallet is low.

Legendary Hunter Route

Measure progress by materials, currencies, achievements, and time-gates.

Prompt

"I want to finish Bolt in the cheapest way"

Completion Breakdown

Materials, currency, achievement and time-gated progress are computed separately.

Blocker Detection

Gift of Battle, Mystic Clover, account-bound materials, map currencies, collections.

Strategy Changes

Make cheaper, faster, gold-first, avoid WvW, or limit daily time.

Top 3 Actions

Sell liquid assets, farm required content, start Gift chains.

Report

Export a path with costs, days, and unavailable-by-gold blockers.

Economy & Gold Route

Conservative value, liquidity scoring, TP opportunities and sell candidates.

Prompt

"Make gold this week"

Conservative Value

Instant Sell = highest buy order x 0.85 after TP fee.

Liquidity

Buy volume + sell volume; low liquidity reduces confidence.

Hidden Wealth

Unused materials and sellable assets surfaced as immediate cash.

TP Opportunity

Spread after fee above threshold is flagged, with risk note.

Exports

Copy plan now; HTML/PDF report; CSV planned.

PvE, Casual and Guild Paths

Different playstyles need different levels of pressure and detail.

PvE Player

Fractal / Raid / Strike readiness. Build source, patch, role and mode are shown. Suggested additions: AR check, encounter readiness, low-intensity builds.

Casual Player

Low Effort / No Stress routes. 30-minute plans, skip-safe actions, no forced high-pressure content.

Guild Leader

Current edition supports personal reports and share links. Full build coverage, role gap and member dashboard belong to Guild Edition.

Recommended beta focus

Returning players + Legendary hunters + Economy players

Trust, Privacy and Monetization

A guide for a public beta and expo audience.

Session Mode

API key is used in memory only and discarded when the session closes.

Saved Mode

Optional encrypted key storage for weekly reports.

Share Mode

Anonymous share links hide account name and full asset details by default.

Read-only API

Cannot log in, move items, sell items, delete characters, or modify your account.

Free vs Full Report vs Weekly

Feature	Free	Full \$5	Weekly \$5/mo
Actions	3	All	All
Build analysis	-	Yes	Yes
Crafting path	-	Yes	Yes
HTML/PDF	-	Yes	Yes
Auto updates	-	-	Yes
Market alerts	-	-	Yes

Choose a goal. Get a route.

GW2 Progression OS turns account state into action.

Best beta audience: returning players, legendary hunters and economy-focused players. Demo first, session-only by default, share anonymously.
